

Acción de actualización

En la ventana de acciones, se deberá seleccionar **Install** y el propósito de la acción será **Required**

The screenshot shows the 'Deploy Software Wizard' window with the 'Deployment Settings' tab selected. The window title is 'Deploy Software Wizard' and the subtitle is 'Deployment Settings'. The left sidebar contains the following options: General, Content, **Deployment Settings** (highlighted), Scheduling, User Experience, Alerts, Summary, Progress, and Completion. The main area is titled 'Specify settings to control this deployment' and contains the following settings:

- Action: **Install** (selected in a dropdown menu)
- Purpose: **Required** (selected in a dropdown menu)
- ☐ Allow end users to attempt to repair this application
- ☒ When a resource is no longer a member of the collection, uninstall this application
- ☐ Pre-deploy software to the user's primary device
- ☐ Send wake-up packets
- ☐ Allow clients on a metered Internet connection to download content after the installation deadline, which might incur additional costs
- ☒ Automatically upgrade any superseded versions of this application

At the bottom, there are four buttons: '< Previous', **Next >** (highlighted), 'Summary', and 'Cancel'.

Al final deberá activar la casilla que dice **When a resource is no longer a member of the collection, uninstall this application**. Esto lo que significa es que cuando el usuario o el dispositivo se saquen de la colección automáticamente se le enviará la orden de desinstalar el agente.

The Fraud Explorer es un software que junto con **FraudGPT** detecta el fraude y la corrupción en las organizaciones. Este software está siendo desarrollado por [NOFRAUD.la](#).
