

Experiencia para desplegar actualización

En esta ventana se configura la experiencia del usuario para que no se le muestre ningún tipo de aviso ni tenga ninguna interacción con la actualización del agente.

The screenshot shows the 'Deploy Software Wizard' window with the 'User Experience' tab selected. The left sidebar lists the following options: General, Content, Deployment Settings, Scheduling, **User Experience** (highlighted), Alerts, Summary, Progress, and Completion. The main area is titled 'Specify the user experience for the installation of this software:' and contains the following settings:

- Specify user experience setting for this deployment:**
 - User notifications:** A dropdown menu set to 'Hide in Software Center and all notifications'.
 - ☐ When software changes are required, show a dialog window to the user instead of a toast notification
- When the installation deadline is reached, allow the following activities to be performed outside the maintenance window:**
 - ☐ Software Installation
 - ☐ System restart (if required to complete the installation)
- Write filter handling for Windows Embedded devices:**
 - ☒ Commit changes at deadline or during a maintenance window (requires restarts)

A note at the bottom states: 'If this option is not selected, content will be applied on the overlay and committed later.'

At the bottom right, there are four buttons: '< Previous', 'Next >' (highlighted with a blue border), 'Summary', and 'Cancel'.

Se deberá elegir la opción **Hide in Software Center and all notifications** para que no se le presente al usuario ninguna alerta al momento de llevar a cabo la actualización.

The Fraud Explorer es un software que junto con **FraudGPT** detecta el fraude y la corrupción en las organizaciones. Este software está siendo desarrollado por [NOFRAUD.la](#).
