

# Agenda de la actualización

En la ventana de agendar la actualización se puede programar para cuándo se realiza.

The screenshot shows the 'Deploy Software Wizard' window with the 'Scheduling' tab selected. The window title is 'Deploy Software Wizard' with a green arrow icon. The 'Scheduling' tab is highlighted in the left sidebar. The main area is titled 'Specify the schedule for this deployment'. It contains a paragraph explaining that the application will be available as soon as it is distributed unless scheduled for a later time. Below this, there are two main sections: 'Time based on:' with a dropdown set to 'UTC', and 'Schedule the application to be available at:' with a date/time picker set to '7/11/2025' and '10:10 PM'. Underneath, the 'Installation deadline:' section has two radio button options: 'As soon as possible after the available time' (which is selected) and 'Schedule at:' (with a date/time picker set to '7/11/2025' and '10:10 PM'). At the bottom, there is a checkbox for 'Delay enforcement of this deployment according to user preferences, up to the grace period defined in client settings.' The bottom right of the window has four buttons: '< Previous', 'Next >' (highlighted with a blue border), 'Summary', and 'Cancel'.

Specify the schedule for this deployment

This application will be available as soon as it has been distributed to the content server(s) unless it is scheduled for a later time below. Specify the installation deadline if this is a required application. This deadline is when the application must be installed on the device, including a system restart if necessary.

Time based on: UTC

☐ Schedule the application to be available at:

7/11/2025 10:10 PM

Installation deadline:

☒ As soon as possible after the available time

☐ Schedule at:

7/11/2025 10:10 PM

☐ Delay enforcement of this deployment according to user preferences, up to the grace period defined in client settings.
