

Alertamiento de actualización

Se pueden configurar alertas en caso de que la actualización falle o no se lleve a cabo.

The screenshot shows the 'Alerts' configuration window in the 'Deploy Software Wizard'. The window title is 'Deploy Software Wizard' and the current step is 'Alerts'. The left sidebar contains the following navigation options: General, Content, Deployment Settings, Scheduling, User Experience, Alerts (selected), Summary, Progress, and Completion. The main area is titled 'Specify Configuration Manager and Operations Manager alert options'. It contains the following settings:

- Configuration Manager generates alerts when this application is deployed.**
 - Threshold for successful deployment:**
 - Create a deployment alert when the threshold is lower than the following:
 - Percent success: 1
 - After: 7/18/2025 3:10 PM
 - Threshold for failed deployment:**
 - Create a deployment alert when the threshold is higher than the following:
 - Percent failure: 0
- Enable System Center Operations Manager maintenance mode if you want Operations Manager to generate alerts when this application is deployed.**
 - Enable System Center Operations Manager maintenance mode
 - Generate System Center Operations Manager alert when a software installation fails

At the bottom of the window, there are four buttons: '< Previous', 'Next >' (highlighted), 'Summary', and 'Cancel'.

Se recomienda no configurar ninguna alerta y proceder con las opciones por defecto.
