

Deployment de la desinstalación

Para crear un **Deploy** de desinstalación, de clic derecho sobre la última aplicación creada (la última versión del agente) y luego en la opción Deploy.

The screenshot shows the 'Deploy Software Wizard' window with the 'General' tab selected. The window title is 'Deploy Software Wizard'. The left sidebar contains a list of steps: General, Content, Deployment Settings, Scheduling, User Experience, Alerts, Summary, Progress, and Completion. The main area is titled 'Specify general information for this deployment'. It contains two text boxes: 'Software:' with the value 'Business Analytics Upgrade' and 'Collection:' with the value 'All Desktop and Server Clients'. Both text boxes have 'Browse...' buttons to their right. Below these are two checkboxes: 'Use default distribution point groups associated to this collection' (unchecked) and 'Automatically distribute content for dependencies' (checked). At the bottom is a 'Comments (optional):' label above a large text area. At the very bottom are four buttons: '< Previous', 'Next >', 'Summary', and 'Cancel'.

Deploy Software Wizard

General

Specify general information for this deployment

Software: Business Analytics Upgrade Browse...

Collection: All Desktop and Server Clients Browse...

☐ Use default distribution point groups associated to this collection

☒ Automatically distribute content for dependencies

Comments (optional):

< Previous Next > Summary Cancel

En la ventana de **Deploy** seleccione la colección de usuario o dispositivos en los cuales se llevará a cabo la desinstalación del agente.
