

# Experiencia del usuario

La experiencia del usuario en la pantalla **Deploy** se refiere a aquellos comportamientos que se le mostrarán y se le permitirán al usuario realizar con nuestro instalador. Para una instalación silenciosa y desatendida, se recomienda elegir la opción **Hide in Software Center and all notifications**.

The screenshot shows the 'Deploy Software Wizard' window, specifically the 'User Experience' tab. The window title is 'Deploy Software Wizard' and the tab is 'User Experience'. The main heading is 'Specify the user experience for the installation of this software:'. Below this, there is a section 'Specify user experience setting for this deployment' with a dropdown menu for 'User notifications' set to 'Hide in Software Center and all notifications'. There are two checkboxes: 'When software changes are required, show a dialog window to the user instead of a toast notification' (unchecked) and 'When the installation deadline is reached, allow the following activities to be performed outside the maintenance window:'. Under the second checkbox, there are two sub-options: 'Software Installation' (unchecked) and 'System restart (if required to complete the installation)' (unchecked). Below this is a section 'Write filter handling for Windows Embedded devices' with a checked checkbox 'Commit changes at deadline or during a maintenance window (requires restarts)'. A note below states: 'If this option is not selected, content will be applied on the overlay and committed later.' At the bottom, there are four buttons: '< Previous', 'Next >', 'Summary', and 'Cancel'.

Con esta configuración, el agente de SCCM en el dispositivo del usuario no mostrará ningún mensaje de instalación o desinstalación del agente de The Fraud Explorer.
