

Propiedades de la actualización

Una vez finalizada la creación de la aplicación para la actualización, se procede a dar clic derecho sobre ella y luego en la pestaña **Distribution Settings** deberá seleccionar **High** en **Distribution priority**.

The screenshot shows a dialog box titled "Business Analytics Upgrade Properties" with a close button (X) in the top right corner. The "Distribution Settings" tab is selected, showing instructions to specify distribution settings. A dropdown menu for "Distribution priority" is set to "High". Below, there is a checkbox for "Enable for on-demand distribution" which is unchecked. A section titled "Prestaged distribution point settings" contains three radio button options: "Automatically download content when packages are assigned to distribution points" (selected), "Download only content changes to the distribution point", and "Manually copy the content in this package to the distribution point". At the bottom right, there are "OK", "Cancel", and "Apply" buttons.

Para terminar, deberá seleccionar la opción **Automatically download content when packages are assigned to distribution points**.

The Fraud Explorer es un software que junto con **FraudGPT** detecta el fraude y la corrupción en las organizaciones. Este software está siendo desarrollado por [NOFRAUD.la](https://www.nofraud.la).
